*Auditing Committee.*

CHELMSFORD, March 3, 1886.

# COMMONWEALTH OF MASSACHUSETTS.

---

MIDDLESEX, SS.

*To either of the Constables of the town of Chelmsford, in said County,*  
*GREETING:*

In the name of the Commonwealth aforesaid, you are hereby required to notify the legal voters of said Chelmsford to meet at the Town Hall, at Chelmsford Centre, on Monday, the fifteenth day of March current, being the third Monday in said month, at nine o'clock in the forenoon, then and there to act on the following articles, viz: —

- ARTICLE 1. To choose a moderator.
- ART. 2. To hear report of town officers and committees, and act thereon.
- ART. 3. To determine the manner of collecting the taxes.
- ART. 4. To determine the manner of repairing the highways, townways, and bridges.
- ART. 5. To choose all necessary town officers.
- ART. 6. To act in relation to the list of jurors prepared by the Selectmen.
- ART. 7. To raise and appropriate such sums of money as may be necessary to defray town charges for the ensuing year.
- ART. 8. To see if the town will authorize the treasurer to borrow such sums of money as may be required for the payment of the demands upon him in anticipation of the taxes of the ensuing year, and payable therefrom.
- ART. 9. To see if the town will vote to grant licenses for the sale of intoxicating liquors for the current year.
- ART. 10. To see if the town will vote to renew the insurance on the public buildings, or act in relation thereto.
- ART. 11. At the request of E. H. Warren, David Perham, and others, to see if the town will vote to choose a committee to investigate the necessities of the cemetery at centre of the town, and report at the next March meeting, or act in relation thereto.
- ART. 12. At the request of S. J. Garland, Artemus Parker, Warren Berry, E. P. Parker, and others, to see if the town will vote to dig a well at the school-house at South Chelmsford, put a pump in the same, make an appropriation therefor, or act in relation thereto.

- ART. 13. At the request of J. A. Bartlett, Geo. A. Parkhurst, C. S. Reed, N. C. Saunders, and others, to see if the town will vote to build an addition to the school building at the centre of the town, and provide furniture therefor, and make an appropriation for the same, or act in relation thereto.
- ART. 14. At the request of C. Roby, J. J. Hoyt, A. Gardner, G. F. Locke, and others, to see if the town will appropriate the sum of four hundred dollars, or any other amount which may be thought necessary, to straighten and widen the street near the railroad station at West Chelmsford, or act in relation thereto.
- ART. 15. At the request of L. M. Dutton, to see if the town will vote to appropriate money to obtain means to extinguish fires, or act in relation thereto.

And you are directed to serve this Warrant, by posting up attested copies thereof at the Post-Offices in the centre of the town, South Chelmsford, North Chelmsford, West Chelmsford, and at the School-house at East Chelmsford, ten days at least before the time appointed for holding said meeting.

Hereof fail not, and make return of this Warrant, with your doings thereon, to the Town Clerk at the time and place of holding the meeting aforesaid.

Given under our hands this fifth day of March, in the year of our Lord eighteen hundred and eighty-six.

HENRY S. PERHAM,  
CHAS. W. FLINT,  
R. WILSON DIX,  
JOHN Q. BATTLES,  
GEO. F. SNOW,

*Selectmen of Chelmsford.*

I have served the foregoing Warrant, by posting up true and attested copies of the same at the places above mentioned, more than ten days before the day of holding said meeting.

JAMES P. EMERSON,

*Constable of Chelmsford.*

ANNUAL REPORT

OF THE

SCHOOL COMMITTEE

OF THE

TOWN OF CHELMSFORD,

FOR THE

YEAR ENDING FEB. 27, 1886.

LOWELL, MASS.:

VOX POPULI PRESS: 130 CENTRAL STREET.

1886.

## COMMITTEE'S REPORT.

---

THE School Committee in submitting their Annual Report to the citizens of the Town, respectfully represent that the interests of education in Chelmsford have in no wise diminished during the year; while in some respects, it is believed they have made decided advances.

By invitation of the Committee, the Secretary of the State Board of Education, Hon. John W. Dickinson, and Messrs. Prince and Martin, agents of the Board, visited our town early in September, and spent some time examining into the condition of our schools. At the close of their visit, they held a meeting at the Centre School-house, at which were present all of our teachers, the Superintendent, and several of the Committee.

At this meeting they detailed the result of their observations, and suggested such changes as seemed desirable and possible for the teachers to make, and in giving the assembled teachers illustrations of normal methods,—the teachers being treated as pupils, while the Secretary and Agents divided the

time in suggesting improved methods for the work of the school-room.

The counsel given was excellent, and well pleasing to those present; and we have seen good resulting therefrom.

A good deal of complaint has reached us during the year, from some of our neighboring cities and towns, in regard to a great defect in our present system of education; that we try to do too much and to go over too much ground in the limited time devoted to school-life; thereby neglecting the elementary branches and the foundation of a good education.

The ornamental and higher branches of study, as they are called, have a peculiar charm for both teacher and pupil, and the child's progress is sometimes measured not by his thorough knowledge of elementary principals, but by the number of advanced studies he has pursued.

Our public schools are not intended to supply the place of universities, but rather to provide for the people those elements of knowledge everywhere essential in the journey of life.

When a young man can read, spell, write, and reckon well, he has a good educational foundation, and it would be difficult to find any more useful attainments in the whole realm of study; without these any great proficiency in learning is impossible; with them, the way is open to the broadest and most comprehensive acquirements. This should

be made the first and great aim through the entire course of school education.

There has been more than the usual number of changes in our corps of teachers; this is to be regretted. It requires at least one term to acquaint scholars and teachers with each other. Each teacher has his or her peculiarities of instruction. One is inclined to urge by force or fear; another by hope of reward. One believes the teacher to be monarch of the school-room; another is more republican in his views of school government. This teacher counts progress by the number of pages learned; another succeeds who goes slowly but surely. After a term or two of trial and acquaintance with each other's ways, the school and teacher move on with less friction and greater efficiency. The parents also become acquainted with the teacher and are more apt to add their aid in advancing the school's interest, and thus a new impetus is given to progress. It is not in the power of even a good teacher to accomplish much for a school in a single term. The second term is worth nearly double the first. But change your teachers often and it is impossible for any school to make a steady progress and arrive at a high grade, to fulfill the just expectations of the parents or friends of education.

Although there are still imperfections in our school system, we think we may safely conclude that the standard is at least as high as in any of

the adjoining towns. With every thing to encourage and inspire us for redoubled effort, let us labor more earnestly in the future than we have done in the past, to improve our public schools in which we are all so deeply interested:

## REPORT OF THE SUPERINTENDENT.

---

*To the School Committee of the Town of Chelmsford:*

GENTLEMEN,— The time has again arrived when a detailed report of the schools of the town must be presented to you, and through you to the citizens of the town and the school officers of the Commonwealth. I do not know that I have much new to add to the reports of former years, only that I think the tendency of the schools, as a whole, is to more thorough and progressive work, especially in arithmetic, and I am of the opinion that if the classes do well in arithmetic, we need have no fear about the other studies.

As you are all aware, Mr. John T. Prince and Mr. Martin, agents of the State Board of Education, visited the schools at the beginning of the fall term, although I do not think it was the best time, so soon after the long summer vacation and before some of the schools were fairly organized, to fairly judge of what we are doing; yet they paid us the compliment of saying that they were above the average. I was thankful to hear that, and from it took courage.

### ORAL AND WRITTEN SPELLING.

There is now some discussion of the comparative merits of oral and written spelling, and some teachers seem to give preference to the written and somewhat

neglect the oral. I have noticed that the best work is done in spelling where the two methods are combined, and preference given to the oral method in the class. The stimulus that comes to scholars from taking places in the spelling-classes, and the advantage of pronouncing the words in the hearing of the teacher, for the sake of correct pronunciation we can not afford to dispense with in our schools, so the teachers who have followed the suggestions of the Superintendent the past year have followed both methods.

#### SCHOLARS DO THE RECITING.

I have also suggested to the teachers to, as far as possible, allow the scholars to do their own reciting, independent of the teacher's aid, and to allow the scholars in the class to read their own examples in arithmetic, and where this has been followed more thorough work is the result.

#### SCHOOL LIFE MORE PLEASANT THAN FORMERLY.

I think, by the methods now pursued in the schools, school life is more pleasant to the average scholar than formerly. We teach the children now the whys and the therefores, and when they make a statement we ask them how they know it is true. By this method their recitations are not merely a matter of memory, but they understand their work better, and their understanding aids the memory, and they do not have to fear that they shall be punished or be cut down in their rank if they forget a word in the text-book.

#### TEMPERANCE INSTRUCTION.

Temperance instruction has also received attention in the schools during the year, and I think the result will

be of infinite value to the rising generation, as I think many form the intemperate habit because not warned of the danger of drinking a little.

#### MORAL ATMOSPHERE.

I think also that, taking the schools as a whole, there is a good healthy moral influence surrounding them, and the tendency is to help the scholars to be good as well as to be educated.

#### RECITING ARITHMETIC TABLES IN CONCERT.

There seems to be a difference of opinion as to the advantage of reciting the arithmetic tables in concert in the classes. In schools where the children did not know the arithmetical tables and had been taught by the individual method, I suggested that for the sake of getting over the hesitancy contracted by the individual method which was noticeable in all their recitations, that they adopt the concert method, and great was the improvement. There is also a saving of time by the concert method, and in some of the schools time is an item of considerable importance.

#### PROGRESSIVE TEACHERS.

As Superintendent for the past four years I have seen thirty-seven different teachers at work in the schools of this town. It is not to be supposed that they were all equally progressive, but during that time there have always been teachers that were progressive. Those who have been in the habit of visiting schools in the cities of Lowell and Boston and of reading educational journals, — these teachers have been of great advantage to me as Superintendent in getting a variety of methods, and of seeing those methods in practice before suggest-

ing them to non-progressive teachers ; and as variety is the spice of life, so variety of methods is the spice of the intellectual life of children.

The following is a brief detailed report of each school : —

NO. 1. — CENTRE OF THE TOWN.

*Grammar and High School.* — The principal through the year here was Miss F. V. Doane. Miss Doane possesses a great deal of energy and some excellent qualities as a teacher, and in some of her classes good results were noticeable ; but the school is too large and takes too much of the principal's time and energy to manage the school to secure the best results in teaching, but Miss Doane's classes were well prepared for the annual examination at the close of the year.

The assistant here for the spring term was Miss Carrie E. Jockow, of Lowell. This was Miss Jockow's first experience at teaching, but she exhibited qualities that experience in teaching will make her a successful teacher. She resigned at the close of the term to go West, and was succeeded by Miss Mary Howard, who taught here some years ago. Miss Howard's reputation as a teacher is too well known in this town to need comment. She took great pains to have scholars get their lessons and the drawing-books of her scholars were about perfect, as far as I saw them. She asked to be released at the beginning of the winter term, and was succeeded by Miss Pierce, of Royalston, Mass. Miss Pierce has had considerable experience as a teacher ; she is a good disciplinarian, and her classes took great pains to do their work well and were very much interested in their lessons.

*Primary School.* — Miss Nellie M. Perham was the teacher here through the year, and good work was done.

There has been great improvement in this school since I first became acquainted with it. Arithmetic classes here are doing well, Reading, for the most part, is natural and expressive, and the scholars are taught to get the meaning of the pieces read. The examination here was good.

No. 2. — *MIXED*. NORTH ROW.

Miss Carrie E. White taught this school the spring and fall terms, and kept her scholars wide awake, studious, and advancing, and the order was all that could be desired. The winter term was taught by Miss Onie Hobbs. Miss Hobbs possesses many qualities of a good teacher, such as enthusiasm and a love for her work, and her term's work will compare favorably with the first term's work of some of our most successful teachers.

No. 3. — *MIXED*. SOUTH CHELMSFORD.

Miss Araminta V. Paasche was in charge of this school, and the progress in all the studies taught was all that could be desired. As I visited the school and called up classes out of their turn to recite, they seemed so well prepared, and did their work so understandingly from the lowest to highest grades, that I felt convinced that Miss Paasche was advancing her scholars as fast as they ought to be advanced. Her examination at the close of the year was perfectly satisfactory to all concerned, I think.

No 4. — *MIXED*. SOUTH ROW.

Miss Lenora Battles taught here the spring term, and kept up the interest she had awakened last year, and resigned at the close of the spring term, to accept a position as teacher in Sudbury, Mass. Miss Gertrude W. Byam, of South Chelmsford, taught the school the rest

of the year. Miss Byam is a faithful, diligent, conscientious teacher, and kept her scholars at work and advancing. There are some bright, wide-awake scholars in this school.

NO. 5.—*MIXED*. ESQUIRE BYAM'S NEIGHBORHOOD.

Miss Ida E. Byam taught this school, and I am safe in saying that no more thorough work was done any where than here, and the advancement of the scholars was as rapid as the advancement of scholars of their ages ought to be

NO. 6.—*MIXED*. EAST CHELMSFORD.

Miss Susie McFarlin taught this school the past year, and good results have been accomplished. Mental arithmetic with the younger classes received careful attention from the teacher, and teacher and scholars seem to work in harmony. This school is doing well.

NO. 7.—*MIXED*. SPAULDING'S NEIGHBORHOOD.

This school had for its teacher the past year Miss Etta Locke. Miss Locke took great interest in her scholars, kept them interested in their work, encouraged those that were slow, and visited other schools for the sake of getting a variety of methods. This school always seemed in good working condition. The examination at the close of the year showed that careful and thorough work had been done.

NO. 8.—NORTH CHELMSFORD.

The schools here are now well graded, and so arranged that scholars and teachers can do their best work.

*High School*. — Rev. D. Phillips was the principal in this department. It was very pleasant to go into this

room and hear scholars recite independent of the teacher's questions from five to ten minutes. It seemed more like persons making speeches, than like boys and girls reciting. A class of fourteen was graduated from here last June, who in their essays and declamations appeared more like college graduates, than like high school boys and girls fifteen and sixteen years old.

*Grammar School.*—Miss Addie M. Taylor was in charge here through the year. Every thing in this room is done in a prompt, wide-awake manner. Each one striving to do his or her best, as it appeared to me. The examination at the close of the fall term was excellent, and gave the impression that a large fund of information and a large amount of mental discipline were in circulation in this school. The declamations were very fine.

*Intermediate School.*—This school was in charge of Miss Minnie A. Worden; on account of the absences of the scholars, no public examination was held in this school the past year. Considerable attention has been given here to composition the past year with good effect. There are many very interesting scholars in this school.

*Primary School.*—Miss Laura G. Hoyt still continues to do good work in this school. All departments receive careful attention from the teacher. Something new may be seen in this school nearly every term. Miss Hoyt has a table on which she keeps a lot of wooden blocks, to which she allows her scholars to go for rest and amusement when they have their lessons. Physiology taught orally in this school is remarkable.

NO. 9. — WEST CHELMSFORD.

*Grammar School.*—Miss Laura L. Butterfield taught here the spring term, and did good work. Every thing

was done in a thorough manner, and scholars gave signs of being interested in their work. Miss Butterfield resigned at the close of the term to accept a position as teacher at Hampton Falls, N. H. The remainder of the year the school was taught by Miss Carrie M. Robbins, of Carlise, who took up the work where her predecessor left it, and carried it through the year very successfully. Miss Robbins is an excellent scholar, and her work was very thorough.

*Primary School.*— The same teacher that has been in charge here for a number of years was in charge the past year, Miss Agnes Naylor. Miss Naylor is one of our most progressive teachers, and has been of great help to me as Superintendent, in proving what can be done by little people. When I have made suggestions she never objected, saying "They have not ability to do such work," but always said "I will try," and her scholars have exceeded my expectations as well as her own.

One of the visitors of the State Board of Education who heard her classes in arithmetic only suggested that perhaps she had neglected other studies in advancing her scholars so far ahead in arithmetic. I assured him that she had not, but that her classes in reading, writing, spelling (oral and written), and geography were equally as good as her arithmetic classes. In this school, to me, every thing is done in a satisfactory manner. The phonetic method in reading, as well as others, is taught to good advantage here.

This, then, is a brief report of the schools. Many other good things might be put on paper as well as more defects, but criticism on paper, I do not think, will do much good. It has been my custom, as Superintendent, when a new teacher was put in the schools, to visit that

school quite often and make suggestions to the teacher, and not wait until the end of the year and then put the teacher's defects on paper.

I have, also, tried to encourage the teachers in their work, except, perhaps, in cases where teachers were old-fashioned in their methods and dead-set in ruts. As every one knows who has studied the subject, there has been great improvement in the methods of instruction within the last ten or twelve years, and unless the older teachers visit other schools, and find out what is actually being done in them, they are likely to follow the methods of their own teachers and so be ten or twelve years behind the times.

I close thanking you, gentlemen, for having entrusted me with the care of the schools the past year; and I close this, my fourth yearly report, realizing the advantage that a Superintendent can be to the schools, and also the delicate position in which the Superintendent is placed, being really the servant of nine men, constituting the School Committee, fifteen teachers, and nearly five hundred scholars, besides a large number of parents and friends of the scholars. To get books and supplies for all these is not a small matter; besides, the Superintendent, to be of any advantage to the schools, must study the educational problems, and visit schools outside to learn what is actually being done in them: but it is a work I love, because of the service I can render to the youth of the town.

Respectfully submitted,

J. H. VINCENT,

*Superintendent.*

March 6, 1886.

## ROLL OF HONOR—PUPILS NOT ABSENT.

Those marked \* were tardy.

# COURSE OF STUDY,

*Adopted Nov. 25, 1882.*

---

## FIRST YEAR.

*Reading.*—Monroe's Chart. Teachers write words from the Chart in script letters on the black-board, and teach scholars to read the same; also, write short names of familiar objects in the school-room and Monroe's First Reader.

*Writing.*—Commence with the letters i and o, figure 1, and Roman letter I, and progress in these directions as fast as scholars are capable; also, copy short sentences from the board.

*Spelling.*—Words from Reading Chart. Days of week, own names, town and village in which they live, names of familiar objects in the room and at home.

*Arithmetic.*—Count from one to ten, and so on to a hundred, with and without numeral frame. Add and subtract small numbers with and without numeral frame.

Singing and Physical Exercises daily. These things are to be taught, and teacher must use discretion about other things.

## SECOND YEAR.

*Reading.*—Monroe's Second Reader.

*Writing.*—No. 1 Tracing Book, and write sentences on slate and black-board.

*Spelling.*—Swinton's Word Primer, first half.

*Arithmetic.*—Eaton's Primary, first half.

Singing and Physical Exercises daily.

## THIRD YEAR.

*Reading.*—Swinton's Supplementary to Second Reader. Teach the meaning of words in the lesson.

*Writing.*—No. 2 Tracing Book. Copy sentences from black-board.

*Spelling*.—Swinton's Word Primer, last half.  
*Arithmetic*.—Eaton's Primary, last half.  
*Outlines of History and Geography*.—Taught orally.  
 Singing and Physical Exercises daily.

## FOURTH YEAR.

*Reading*.—Monroe's Third Reader.  
*Writing*.—No. 1 Writing Book.  
*Spelling*.—Swinton's Word Book.  
*Arithmetic*.—First half of Eaton's, part second.  
*Geography*.—Harper's Primary, first half.  
*Drawing*.—Smith's No. 1 Drawing Book.  
*History*.—Taught orally. Singing and Physical Exercises daily.

## FIFTH YEAR.

*Reading*.—Swinton's Supplementary to Third Reader.  
*Writing*.—Book No. 2.  
*Spelling*.—Swinton's Word Book continued.  
*Arithmetic*.—Last half of Eaton's, part second.  
*Geography*.—Last half of Harper's Primary.  
*Drawing*.—Book No. 2.  
*Grammar and History*.—Taught orally. Singing and Physical Exercises daily.

## SIXTH YEAR.

*Reading*.—Monroe's Fourth Reader, also Child's History (Goodrich's).  
*Writing*.—Book No. 3.  
*Spelling*.—Swinton's Word Book continued.  
*Arithmetic*.—First half of Eaton's Intellectual, with examples on board from Eaton's Practical.  
*Geography*.—Harper's Common School, first half.  
*Drawing*.—Book No. 3.  
*Grammar and History*.—Taught orally. Singing and Physical Exercises daily.

## SEVENTH YEAR.

*Reading*.—Swinton's Supplementary to Fourth Reader.  
*Writing*.—Book No. 4.  
*Spelling*.—Swinton's Word Book continued.  
*Arithmetic*.—Eaton's Intellectual, last half. Examples on board from Eaton's Practical.

*Geography.*—Last half of Harper's Common School.

*Grammar.*—Swinton's Language Primer.

*Drawing.*—No. 4. Singing and Physical Exercises daily.

EIGHTH YEAR.

*Reading.*—Monroe's Fifth Reader.

*Writing.*—Book No. 5.

*Spelling.*—Swinton's Word Book continued.

*Arithmetic.*—First half of Eaton's Practical.

*History of U. S.*—Berard's, first half, and Geography reviewed with it.

*Grammar.*—Swinton's Language Lessons.

*Drawing.*—No. 3. Singing and Physical Exercises daily.

NINTH YEAR.

*Reading.*—Monroe's Fifth Reader, and other supplementary reading, as U. S. History.

*Writing.*—Book No. 6.

*Spelling.*—Swinton's Word Book continued, and other words from lessons.

*Arithmetic.*—Last half of Eaton's Practical.

*History.*—Berard's, second half.

*Grammar.*—Swinton's Progressive.

*Drawing.*—Book No. 6. Singing and Physical Exercises daily.

TENTH YEAR. HIGH.

*Algebra, English Composition* (Swinton's), *Physics, Physiology*, Monroe's Sixth Reader. Spelling from lessons studied.

ELEVENTH YEAR.

*Geometry* to follow *Algebra*.

*Book-keeping.*—Meservey's.

*Latin Grammar and Reader.*—Harkness'.

*Physical Geography.*

*Reading.*—Monroe's Sixth Reader.

TWELFTH YEAR.

*Chemistry.*—Steel's.

*Latin* (optional), *Botany*.

*English Literature.*—Swinton's.

Review Practical, or Eaton's High School Arithmetic.

Review and study desired.
